

LOCAL FUTURES CAREERS CLUSTER CASE STUDY

Careers in the built environment - a Careers Carousel with Gardiner & Theobald LLP

Objectives

For this pilot, we wanted to plan an impactful interaction, where young people were able to find out about the wide variety of career pathways within the built environment sector.
Students also explored the value of networking, and were able to meet a range of different volunteers to ask questions about their experiences and careers/education pathways.

Challenges

This event engaged 30 students from two different schools: Barking and Dagenham College and Heathcote School. The meeting was held virtually, with students split into different 'breakout rooms' so that they could be in smaller groups with the volunteers.

Solutions

For part of the session, students discussed a mock group interview challenge and received valuable constructive feedback from the volunteers. The event was also a great way to engage volunteers from across the NextGen partnerships that include New London Architecture, London Property Alliance (City Property Association & Westminster Property Association) and Revo Hub,

OVERVIEW

Careers Education Pilot Programme - Riverlinx Consortium

GLA Project Reference Code: Mayors ESF Programme 2019-23 Lot 11 Careers Clusters
UPIN: 116321

Date participant joined project: July 2020
Date of case study: 14th January 2020
Author of case study: Anne-Marie Greenland, Project Manager

"It was great to see our NextGen industry volunteers come together inspiring young people about the opportunities available within the built environment, whilst teaching valuable job seeking skills. Now more than ever we need to be engaging with young people and encouraging a new and diverse generation of property professionals."

LUCY CUNNINGHAM
Marketing Coordinator and NextGen Representative
